## COMPANY OVERVIEW

MaxAmps lithium batteries are assembled in the USA. We provide lithium polymer and lithium ion batteries for the UAV, aerospace, robotics, and RC industry. We have a fanatical attention to quality and provide a seamless customer experience. Our batteries can be purchased directly on our website at [www.MaxAmps.com](http://www.MaxAmps.com) or by giving us a call.

## TECHNICAL CAPABILITIES

MaxAmps can provide the following products for commercial and government customers:

- Custom build Lithium-Polymer battery packs in any configuration and cell count including a wiring harness and connector.
- Custom charging solutions including power supplies, chargers, and battery management systems(BMS).
- We are dangerous goods certified and can provide worldwide shipping and overnight delivery options.
- Technical support 7 days a week

## QUALITY COMMITMENT

MaxAmps assembles batteries here in the USA and builds them to order. We use only fresh, grade A, voltage matched cells, authentic connectors and high strand count silicone wire.
