

JDECTRON

CREATING HEAVY-DUTY, HIGH QUALITY, PRODUCTION
FLOOR SOLUTIONS FOR OVER 40 YEARS

Our Roots

DecTron emerged from A-dec's pivot to dentistry in **1980**, transforming industrial grade arms into our foundation. Four decades on, we're masters of crafting equipment that revolutionizes productivity and flow in global industries.

Our Craft

Our modular, precision-engineered components are industry staples, guaranteeing unmatched ROI. With a near-zero failure rate over 40 years, DecTron stands for **reliability and adaptability** in enhancing shop floor efficiency.

Our Unwavering Promise

Our dedication to precision, exceptional customer support, and the principle that every project matters has fueled both our growth and our clients' success. Expect **top-tier service**, clear communication, and reliability from DecTron.

WE ARE COMMITTED TO

Enhancing productivity

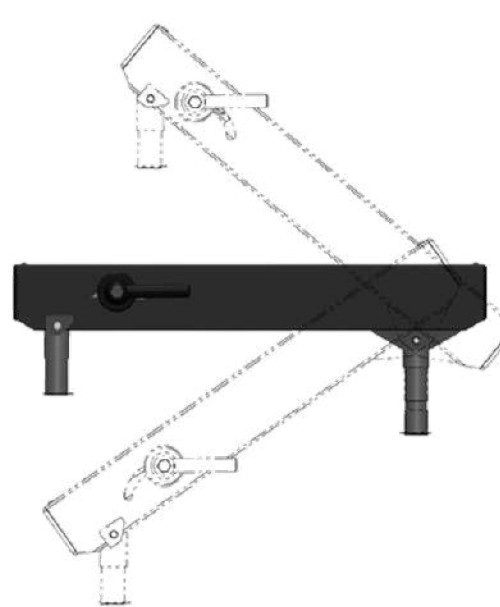

Operational efficiency

Unmatched quality and reliability

Exceptional customer service

Flex Arms Systems

- Wide range of horizontal and vertical movement
- Adjustable, counterbalanced support of loads up to 45lbs
- Up to 4ft of reach and 28 inches of vertical travel

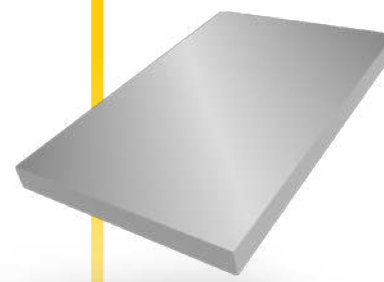

Rigid Arm Systems

- Up to 100lbs of load support
- Up to 4ft of horizontal reach
- Wide range of horizontal movement

Both Flex and Rigid Arm Systems offer

- Optional cable covers that will conceal two ½” diameter cables to keep things nice and tidy.
- High Quality powder coat resists chemicals, stains, abrasions, and normal everyday wear and tear.
- Incredibly customizable to meet unique project requirements.
- Mounts to just about any surface (floor mount, pole mount, wall mount and table mount options.)
- Full custom options for customers that have unique and specific needs not encompassed in our stock lines.
- Modular design allows your configuration to adapt as your production needs evolve.
- **Combine flex and rigid sections for maximum reach and maneuverability.**

We also provide specialized solutions in **stainless steel**. Designed on a bespoke basis, ensuring they precisely meet the unique requirements of our customers for an ideal fit in any specific setting.

We also provide comprehensive shop floor solutions, including fully ergonomic workstations and benches, robust bases for heavy machinery, conveyors, and V.I.E.W. manufacturing towers.

We've partnered with large companies on full facility projects, conducting thorough time studies and productivity and injury analyses before and after implementing our products.

Key Findings

- Significant time savings: Workers saved an average of **1-2 hours daily**.
- **Substantial reduction in workplace injuries**, particularly from repetitive motion and manual handling of heavy tools and equipment.

Our Contribution

- Providing the right equipment for production lines not only **boosts efficiency** but also **enhances worker safety** and well-being.

We have collaborated with high-profile customers across various sectors, including well-known names in aerospace. Beyond aerospace, our diverse client base spans multiple industries, showcasing the versatility of our products.

Our clientele includes companies from the Fortune 1000 to the Fortune 100, highlighting our widespread impact and relevance across different sectors.
